Submitted to Utah Hiking & Outdoors Group

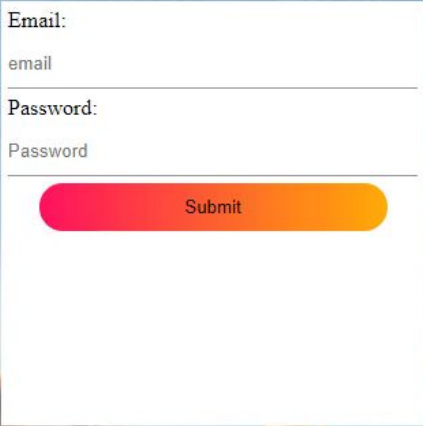

April 20, 2020

Foreword

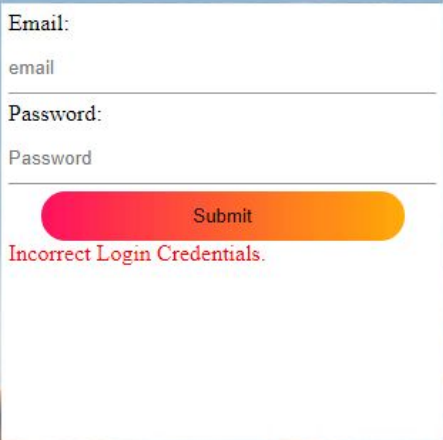

The project was planned between the months of September 2019 and December 2019 following discussions with the Utah Hiking and Outdoors Group stakeholders. Creation and implementation of the project began in February 2020 and was finished April 2020. The following pages describe user functionality of the project.

Phase 1: User Login and login Error, New User sign-up form and sign-up error, and Hike submission process.

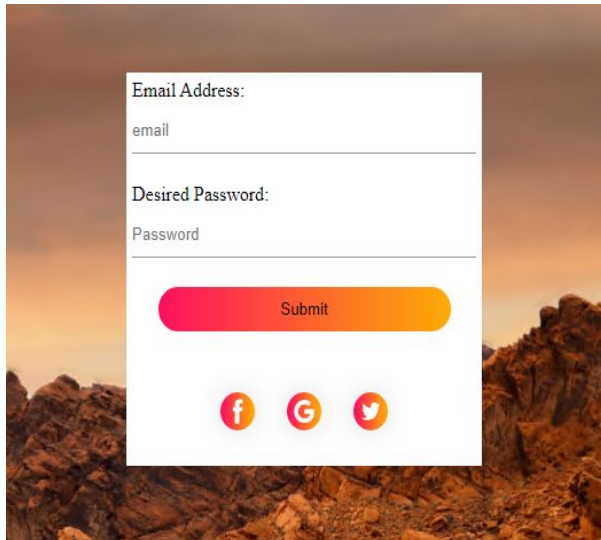

This phase will test the user login and errors of missing information while attempting to login. The hike submission process will also be reviewed.

A login form with a white background and rounded corners, set against a blue sky with clouds. It contains two input fields: 'Email:' with the placeholder text 'email', and 'Password:' with the placeholder text 'Password'. Below the fields is a red-to-orange gradient button labeled 'Submit'.

The new login format for users.

The same login form as above, but with an error message 'Incorrect Login Credentials.' displayed in red text below the 'Submit' button.

If a user provides incorrect login credentials or no login credentials an error message is displayed.

Please Complete All Fields.

This is the error message which is activated if a hiker or user does not provide the necessary information to submit a hike.

Once the hike has been submitted the user will receive this message and wait for the hike to be approved by the Administrator.

Phase 2: Viewing Approved Hikes

Once the hike has been approved by the administrator, it will appear on the homepage of the website for all viewers to see.
